ROBLOX has also been criticised for being very difficult to use and has many bugs within the site interface itself, problems which seem to go unresolved by the

development team despite repeated complaints over a number of years. Although the website's interface is not difficult to use, it has become more complex over the years with features such as video editing with a dedicated program and large amounts of unnecessary superfluous features. Some of the features include: UIs for uploading and viewing custom models, importing music, applications, and sounds; importing sounds from WAV files; creating galleries; creating art sheets; creating an unlimited amount of variations for models by changing their scale and pose; adding animations to models (e.g. walking); creating global themes which change every time you go into a game or lobby; creating global music tracks in .
